Preliminary ☐ Or Approved ☒.

ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite): The 200 acre site has historically been used for hay production and cattle grazing, and contains 1 isolated wetland. There is a PEMC (0.87 acres in size) wetland on the site. Aerial photography (Late 1990's), NWI data, Gregory County SSURGO data/Hydric Soil list, were reviewed, in addition to a site visit, and no surface hydrological connection was found, nor were the wetlands adjacent to other water of the US. No known interstate commerce connection is known to exist, and there is no reasonable potential for navigation on these wetlands. No other waters occur on the site in the area to be impacted.
